EDUCATION

University of Notre Dame

Bachelor of Science, Majors: Honors Mathematics and Honors Economics

Honors: *cum laude* | GPA: 3.922/4.00

Notre Dame, IN

2019–2023

EXPERIENCE

University of Chicago, Harris School of Public Policy

Pre-doctoral Research Assistant for Professor Bruce D. Meyer

Chicago, IL

June 2023 - Current

- Utilize Special Sworn Status to access administrative tax and government program data in Census Research Data Centers to study poverty
- Currently working on a project studying the employment and poverty effects of the replacement of the Child Tax Credit with a proposed Child Allowance (Results are in the process of being disclosed to the public)
- Maintain a detailed set of methods and analysis to communicate with research team across multiple remote locations

Wilson-Sheehan Lab for Economic Opportunities (LEO)

Undergraduate Research Assistant

Notre Dame, IN

May 2022 - December 2022

- Assisted with RCT projects evaluating the impact of services provided by charities and other organizations
- Used STATA to clean data, run regressions, and output tables into \LaTeX documents
- Created data visualizations to present information to research associates, professors, and partnered service providers
- Developed literature reviews and background information for new projects

Econometrics Teacher Assistant

Undergraduate TA for Professor A. Nilesh Fernando

Notre Dame, IN

January 2022 - May 2022

- Assisted students with questions on homework through office hours and by email
- Graded assignments and left feedback to help students improve their understanding
- Connected with students in order to fill gaps in learning as well as offering support and guidance

RESEARCH PROJECTS FROM ECONOMICS COURSES

- **Honors Thesis** Fall 2022 - Spring 2023
 - Evaluated the casual effect of New Jersey's Mt. Laurel Doctrine on housing production using a difference-in-difference model
 - Received Honorable Mention for the John Harold Sheehan Award for Honors Senior Economics Thesis
- **Advanced Labor Economics** Spring 2023
 - Studied the effects of welfare time constraints using a difference-in-difference model taking advantage of states timing and length of welfare constraints.
- **Market Design** Fall 2022
 - Wrote a paper studying the market for hunting permits in Montana and argued for a possible improvement to the allocation method
- **Future of Labor** Spring 2022
 - Worked with a partner to write a paper studying the effect of unions on the adoption of automation using a difference-in-difference using variation from states adoption of Right-to-Work Laws
- **Empirical Methods in Development Economics** Fall 2021
 - Studied Chinese foreign aid and its effects on recipient countries GDP using an instrumental variable approach

SKILLS/OTHER

- **Computer:** \LaTeX (Overleaf), Word, Excel and PowerPoint (and Google equivalents)
- **Programming:** STATA (Advanced) and Python (Beginner)
- **Special Data Access:** Special Sworn Status
- **Honors/Accomplishments:** Honorable Mention for the John Harold Sheehan Award for Senior Economics Thesis
